The controversial practice of age assessments often determines where children are placed. One of the key issues raised was that most refugee and asylum-seeker patients only seek treatment at a very late stage, which leads to significantly poorer health and treatment outcomes.

Stressesthattheneedsofvulnerablepeoplesuchaswomenvictimsofviolence

A Treacherous Journey The rise of gender-based violence stemming from conflict is correlated with the changing nature of conflict. Refugees—nearly half of whom are women—receive health screenings before entering the country and after they arrive. Southwestern Journal of International Law 22 1.

Stressesthecrucialimportanceofprovidingchildcareandcarefordependants was described as a country with one of the highest number of public and private healthcare facilities. Current administrative practices, including increased immigration enforcement, exacerbate the fears already present in the unauthorized immigrant community and may discourage women from seeking out support services.
