In contrast, the TSC distinguishes between evasion techniques and unintended consequences. Adding to existing datasets on sanctions HSE, TIESthese new, closely interrelated datasets enable scholars using both quantitative and qualitative methods to: 1 differentiate among different purposes, types of sanctions, and target populations, 2 assess the scope of different combinations of targeted measures, 3 access extensive details about UN sanctions applied since the end of the Cold War, and 4 analyze changing dynamics within sanctions regimes over time in ways other datasets do not.
